

Assistant Volunteer

Hillingdon Stroke Support, Uxbridge

When stroke strikes, part of your brain shuts down. And so does a part of you. That's because a stroke happens in the brain, the control centre for who we are and what we can do. It happens every five minutes in the UK and changes lives instantly. Recovery is tough, but with the right specialist support and a ton of courage and determination, the brain can adapt. We believe everyone deserves to live the best life they can after stroke. And it's a team effort to get there.

We provide specialist support, fund critical research and campaign to make sure people affected by stroke get the very best care and support to rebuild their lives.

Stroke Association support groups provide vital support for people affected by stroke in their local area. Built on friendships and fun, groups are a safe and supportive space to try things again, to learn more about stroke and self-care and to build people's confidence as they rebuild their life after stroke.

You may also be required to welcome new members at the door or over the phone and provide an overview of their services, as well as check in with them routinely in between meetings to ensure that this service is suitable for them.
